	Coaching Philosophy				
	<p>I believe in providing a positive experience for the young women who play for me and my coaching staff. I want the experience to be emotionally safe and yet physically demanding. We push our girls by providing a competitive environment which leads to a rewarding experience based on hard work. I also believe in providing our coaching expertise at no cost. As an immigrant to this country from Argentina, I was not able to play on some teams because of the cost associated with being on the team. I, nor any of my assistant coaches, charge a fee for our services. All in all, we invest time to teach teamwork, cooperation and long-term player development which leads to a winning philosophy. We are honored and excited to represent our club as its first and only premier team in our age bracket next year, which will allow us to showcase our players to college recruiters and attend the top tournaments which are only available to premier teams. I love to coach and I love my team.</p>
